

FAMILIES IN CANADA: AN INTRODUCTION

WRITTEN for senior high school students, *Families in Canada* looks at the structure and organization of Canadian Families from pioneer days to the present.

Through photographs and quotations from diaries and journals, the reader discovers that although there have been important changes in lifestyles and values, there was no representative family of the past any more than there is a typical family of today.

Issues explored include the effect of industrialization on households, changes in life expectancy and fertility, and various family life cycles.

Author Margrit Eichler, is a professor in the Department of Sociology in Education at the Ontario Institute for Studies in Education. Co-author Mary Bullen is a Family Studies Head with the North York Board of Education, Toronto.
